## EXPERIENCE

---

### Sanmark Solutions

Apr. 2025 – Present

*Software Engineer*

Batapola, Galle

- Developed mobile applications using **Flutter with BLoC** pattern; implemented complex state management for wallet, payment, and video streaming screens
- Built and maintained frontend features using **React with Redux**; managed global state across large-scale client applications
- Integrated third-party services including **HubSpot CRM** sync, **Stripe** payment flows, and **Mux** video player via CDN
- Collaborated in **Scrum** ceremonies; contributed to sprint planning, code reviews, and iterative feature delivery

### Sanmark Solutions

May 2022 – Apr. 2025

*Associate Software Engineer*

Batapola, Galle

- Designed and built RESTful APIs and event-driven services using **NestJS**, **Node.js**, and **Microservices** architecture deployed on AWS
- Developed backend systems with **Laravel** and real-time features using **WebSockets** (Socket.IO, Pusher, Aply) for live broadcasting and notifications
- Built cross-platform mobile apps using **Flutter with GetX** for state management and navigation
- Delivered frontend interfaces with **React with Zustand** and **TanStack Query** for lightweight and scalable state management
- Acted as **Product Owner** in Scrum teams; defined user stories, managed the product backlog, and coordinated stakeholder requirements across multiple projects
- Maintained Dockerised environments using **Docker Compose** and Laravel Sail; implemented CI/CD pipelines with GitHub Actions and GitLab CI
- Contributed to **MongoDB**-backed services alongside relational databases (MySQL, PostgreSQL)

### National Youth Services Council (NYSC)

May 2021 – May 2022

*Web Developer*

- Developed the official NYSC website using HTML5, CSS3, JavaScript, and Bootstrap

### Vocational Training Authority (VTA) – ICT Unit

Feb. 2020 – Apr. 2021

*Web Developer*

- Built the official VTA and VTA SeaScape Hotel websites using HTML5, CSS3, JavaScript, and Bootstrap

## SKILLS

---

**Languages** : TypeScript, JavaScript, PHP, Dart, C#, Python, SQL, Bash

**Backend** : Laravel, NestJS, Node.js, ASP.NET Core, Microservices, REST APIs, WebSockets, Redis, MongoDB

**Frontend** : React.js (Redux, Zustand, TanStack Query), Vue.js, Tailwind CSS, Shadcn/UI, HTML5, CSS3

**Mobile** : Flutter (BLoC, GetX), Dart, Firebase

**Databases** : MySQL, PostgreSQL, MongoDB, Redis, Firebase Firestore

**DevOps** : AWS (EC2, S3), Docker, Docker Compose, Terraform, GitHub Actions, GitLab CI, CI/CD

**Tools** : Git, Jira, Figma, Postman, VS Code, Insomnia

**Practices** : Agile Scrum, Product Ownership, SOLID, Clean Architecture, TDD, ISTQB CTFL

## PROJECTS

---

### Lowkey | *Laravel, Node.js, React, Redux Toolkit, Flutter, BLoC, Mux, WebSockets*

- Developed a full-stack video streaming platform with **Laravel** backend, **Mux** for video processing and CDN delivery, and **Node.js** for real-time event handling via **WebSockets**
- Built the web client using **React with Redux Toolkit** and the mobile client using **Flutter with BLoC**; implemented real-time like counters, milestone broadcasting, and infinite scroll

### HoneyBeeTime | *NestJS, React, Redux, Tailwind CSS, Shadcn/UI, AWS, Microservices*

- Contributed to a workforce time-tracking platform built on **NestJS microservices** architecture deployed on **AWS**
- Developed React frontend with Redux, Shadcn/UI, and Tailwind CSS; implemented RBAC and real-time data flows

### Wolo | *Laravel, Flutter, Flutter BLoC, Firebase*

- Built a workforce management app with **Flutter BLoC** for mobile and **Laravel** for the backend
- Integrated **Firebase** for push notifications and real-time sync across mobile and web clients

### ScribeJoy | *React, Zustand, TanStack Query, Shadcn/UI, Tailwind CSS, Firebase*

- Developed a content platform frontend with React, Zustand, and TanStack Query; integrated Firebase for real-time data and authentication

### Scannorder | *Laravel, MySQL*

- Built a QR-based digital menu and ordering system using **Laravel**; enabled customers to scan, browse, and place orders from their devices

### HIUS | *Laravel, MySQL*

- Developed a healthcare information and user management system using **Laravel**; implemented role-based access control and patient data workflows

### Terraform IaC Starter | *AWS, Terraform – Open Source*

- Published an open-source IaC starter kit for AWS using Terraform to help developers quickly bootstrap cloud environments

### Tournament Management App | *React, Supabase*

- Built a tournament management application using **React** and **Supabase**; implemented real-time bracket updates, match scheduling, and player/team management with Supabase Realtime and Row Level Security

## EDUCATION

---

**London Metropolitan University** 2025 – 2026  
*BEng (Hons) Software Engineering*

**Vocational Training Authority** 2018 – 2019  
*National Diploma – Information Technology*

## CERTIFICATIONS

---

**Certified Tester Foundation Level (CTFL)** Jan. 2026  
*ISTQB – International Software Testing Qualifications Board* Credential ID: SL-CTFL-2601-7169

**Scrum: Advanced** Feb. 2026  
*LinkedIn* Issued Feb. 2026

**Integrating With HubSpot I: Foundations** Jun. 2025  
*HubSpot Academy* Credential ID: 60a654df850b4b178503cc744482a64d
